

Shruti A. Panicker

Boston, MA, 02119 | (617)-309-7606 | shrutipanicker2810@gmail.com | [LinkedIn](#) | [Github](#) | [Website](#)

Seeking full-time opportunities from May 2026 | Open to remote

SUMMARY

Decision scientist with 3.5+ years of enterprise data infrastructure experience spanning production pipelines, BI systems, and GDPR/EUDB-compliant architecture at Fortune 20 scale.

EDUCATION

M.S. in Artificial Intelligence – ML Concentration, *Northeastern University* *Boston, MA, USA* | Sep 2024 – May 2026

GPA: 3.875/4 | **Coursework:** Foundations of AI, Data Processing for AI, Machine Learning, NLP, Human Computer Interaction

B.Tech in Computer Science and Engineering, *Amrita Vishwa Vidyapeetham* *Coimbatore, India* | Jul 2016 – Aug 2020

GPA: 8.06/10 | **Coursework:** Data Structures, Database Management Systems, Data Science, Computational Intelligence

EXPERIENCE

Khoury College of Computer Sciences, Northeastern University

Graduate Teaching Assistant – DS2500: Intermediate Programming with Data *Boston, MA, USA* | Sept 2024 – Apr 2026

- Lead TA for DS2500 across all 4 semesters of MS (250+ students/semester); promoted to curriculum design role, redesigning assignments and project structure adopted department-wide.

Mu Sigma Business Solutions

Apprentice Leader

Bangalore, India | Jan 2024 – May 2024

- Led a **cross-functional team of 10 decision scientists** delivering enterprise analytics for a Fortune 20 technology company's collaboration device portfolio.
- Delivered BI Pulse Dashboard Suite automating **25+ OKR tracking for Group Product Managers**, achieving **100% elimination of manual data pulls**.
- Built and presented a **Tenant Upsell Propensity Model** (TAM/SAM/SOM targeting), driving **5% device adoption growth** through focused upsell campaigns.
- Owned full arc from problem scoping to C-suite presentation with regular weekly stakeholder engagement with Fortune 20 senior leadership.

Decision Scientist

Bangalore, India | Sep 2020 – Dec 2023

- Led 8-month **EUDB-compliant pipeline migration** across 25+ dashboards: redesigned transformation, aggregation and export layers to ensure EU data residency in ADLS Gen2 with no loss in metric accuracy.
- Owned end-to-end analytics delivery for a Fortune 20 enterprise device portfolio, from raw telemetry to executive dashboards, across pipeline engineering, statistical modeling, and **GDPR/EUDB-compliant data governance**.
- Built **graph-based entity resolution system** to deduplicate Device IDs across ADLS and ADE, restoring integrity of metrics used for all portfolio decisions.
- Designed three-state device inactivity framework (dark/churned/reactivated) at device and user level, enabling targeted customer success outreach and driving **18% engagement increase in 6 months**.
- Identified deployment friction points by joining telemetry with support ticket data across setup, configuration, and post-deployment stages, driving **30% increase in device reactivation**.

PROJECTS

- **EUDB-Compliant Azure Data Pipeline Migration** *Mu Sigma Business Solutions*
Redesigned transformation, aggregation, and export pipeline architecture across 25+ dashboards to meet EUDB requirements, ensuring EU tenant data residency in ADLS Gen2 with no loss in metric accuracy. Maintained parallel pipeline branches for EU and non-EU tenants. **Completed within regulatory deadline across an 8-month migration.**
- **Device Identifier Persistence System** *Mu Sigma Business Solutions*
Engineered **graph-based entity resolution** treating device IDs as nodes, with edges between IDs observed on the same physical device. Connected components resolved to canonical IDs, eliminating double counting in metrics. Cross-referenced ADLS and ADE to identify mismatched Device IDs caused by network interface variation. Restored data integrity across all downstream metrics.
- **Devices Deployment Analysis** *Mu Sigma Business Solutions*
Joined device telemetry with support ticket data to identify deployment friction points across setup, configuration, and post deployment stages. Surfaced stage-level drop-off patterns enabling targeted customer outreach, driving **30% increase in device reactivation**.

SKILLS

Data Engineering: Azure Data Factory, ADLS Gen1 & Gen2, Azure Pipelines, Apache Spark, Hadoop, MapReduce, EUDB & GDPR Compliance, MongoDB, AWS | **Languages & Query:** Python, SQL, SCOPE, Kusto Query Language, Power BI DAX, C#, R | **ML & AI:** PyTorch, TensorFlow, Keras, scikit-learn, BERT/Transformers, Hugging Face, SLURM/HPC, Statistical Modeling | **Visualization & BI:** Power BI, Tableau, Azure Data Explorer | **Certification:** Microsoft Fabric Data Engineer DP-700 - exam in May 2026
